

Free On Site Safety Consultation

Annually

Upon request, a consultant from Consultative Services can visit your logging site to offer advice on reducing hazards and eliminating injuries. The consultant will evaluate your equipment and procedures and help you establish a work site safety program. The consultant will contact you directly to arrange a meeting after receiving your request.

You are protected from a general compliance inspection while the consultant is working with you and up to 12 months thereafter. The protection begins after the consultant arrives and begins working with you.

Keep a copy of the request form on the job-site until the consultative sessions begins.

Request for On-Site Safety Consultation Logging Operations (please print)
